- Design of the technical architecture of the e-Congé application (Merise,UML).
- Development of the application and unit tests (Java/JavaFX/MySQL).
- Production of a technical and functional documentation of the application.

PROJECTS

K-Nearest Neighbors algorithm

Janvier 2022 Mini project in C ENSET-M

Create a template that can take any song and, based on its musical attributes, sort it into a playlist with the closest and shared qualities.

Absence management application

De novembre 2021 à janvier 2022 Mini project ACCESS ENSET-M

Realization of an ACCESS application which presents a platform of administrative management within the ENSET-M, in order to automate the management of the absences of the students, the justifications and the notes.

Artisans' platform

D'avril 2021 à juin 2021 End of study project BTS Settat Qualifying Technical High School

Development of a web application "M3ALLEM" in PHP/MySQL and JS, which brings together all the artisans of Morocco in a platform. Where the customer can find a "maallem" in the vicinity easily in a single click.

ACTIVITIES

Awareness-raising campaign

De février 2022 à juin 2022 Let's adopt eco-actions to protect our environment! ENSET-M

Organization of a waste collection campaign in the public places of the city of Mohammedia. Contribution to the conceptual phase of the SMART FARM project initiated at our institution.

Internship seminar

De mars 2022 à mai 2022

BDCCs in 1st appearance: Succeeding in your 1st internship is our business! ENSET-M

Organization of a seminar under the theme for the benefit of engineering students of the 1st year Big Data and Cloud Computing, in order to put at their disposal the necessary elements and the different steps that must be followed to succeed in his interview and land his internship.
